

# Overview

## What is Energy Blockchain Network (EBN)?

EBN is building an ecosystem that will lead the [Energy Technology Convergence](#).

A multi-sided platform which coordinates sales agents/ reps, engineers, developers, installers, utilities, customers, etc. to find & build energy projects.

## Promise Land:

A low-carbon energy future that the world doesn't have to wait for.

## How Do We Get There?

By following EBN's mission to drive DER asset supply chain efficiencies and scale installations for a low-carbon future - today!

## The MVP:

Features first-of-its-kind solutions:

1. Rewards Program to Accelerate Project Velocity
2. Programmable Processes for Building Asset Registries & Enabling Use Cases

## Team, Corporate, and Financial Information

Energy & Fintech | [Whitepaper](#)

HQ in Phoenix, AZ | Founded in '18 | Private, C-Corp | Pre-revenue, \$9MM ARR by '21
